6. Rates for International Long Distance Service (Cont'd)6.3 International Operator Services6.3.A Application of Rates

The total charge for each completed operator assisted call consists of the following charge elements: (a) a measured usage charge dependent on the duration, distance and time of day of the call; (b) a fixed Operator Dialed surcharge which will be dependent on the type of billing selected (i.e., calling card, third party or other) and/or the completion restriction selected (i.e., station-to-station or person-to-person); and (c) other charges as set forth in Section 3.12 preceding. The usage charge element is specified as a rate per minute which applies to each minute of call duration, with fractional minutes of use thereafter counted as one (1) full minute.

6.3.B Taxes

All federal, state and local sales, use and similar taxes, are billed as separate line items and are not included in the quoted rates.

6.3.C Timing of Calls

Billing for calls placed over the Company network is based in part on the duration of the call. Timing of each call begins as specified below, and ends when the called party hangs up.

6.3.C.1 Collect Calls - Timing begins when the called party accepts the responsibility for payment.

6.3.C.2 Person-to-person Calls (other than Collect) - Timing begins when the designated party comes on the line, or when the caller agrees to speak with a substitute party.

6.3.C.3 All other Calls - Timing begins when the called station is answered, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection.
