Grant Services

The surge of funding opportunities in the broadband industry from BEAD, ReConnect, EA-CAM, and numerous others has created a wave of competition and complex decisions that providers must navigate.

JSI has a complete suite of solutions to assist you in the entire funding process from assessing the right opportunity to completing the project.

Opportunity Assessment

Are you ready to apply for a grant? What opportunities make sense for your company?

Our team of experts will provide essential insight leveraging company data and forecasting models to help you make the best decisions for your business including:

- Assessment of Competitive Landscape
- Location Specific Data
- FCC-Sourced Broadband Availability Data
- Business Survey
- Broadband Demand Aggregation Toolsets

Grant Applications

Now that you know what grant you are applying for, where do you begin the application process?

JSI has successfully secured $1.9B of grant dollars for our clients. Work with our team of experts to navigate the complex application process. Our services include:

- State and Federal Funding Applications
- Mapping Funding Areas
- Financial Analysis and Preparation
- Outside Plant (OSP) Engineering Design and Costs
- Inside Plant (ISP) Network engineering and Costs
- Environmental Compliance
